Response to Arguments

Applicant's arguments, filed October 3, 2005 have been fully considered and are persuasive. The previous rejection has been withdrawn. However, upon further consideration, the indicated allowability of claims 10-11 is withdrawn and a new ground(s) of rejection is made in view of Gallant.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 33-35 of U.S. Patent No. 6,757,278 in view of Gallant (US 2002/0057693).

1. Regarding claims 10-11, claims 33-35 of the '278 patent each recites a ATM system comprising a CS-IWF device, where the CS-IWF device and T-IWF devices provide communications only when members of a closed user group. However, claims 33-35 additionally recite end office switches. In removing additional limitations, the scope of the claims is merely broadened by eliminating elements and their functions. It has been held that omission of an element and its function is an obvious expedient if the remaining elements perform the same function as

Art Unit: 2666

before. In re Karlson, 136 USPQ 184 (CCPA). Also note Ex parte Rainu, 168 USPQ 365 (Bd. App. 1969) (omission of a reference element whose function is not needed would be obvious to one skilled in the art). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to not recite end office switches in the '278 patent. Further, claims 33-35 of the '278 patent does not recite establishing a SVC between members of a closed user group. Gallant discloses an ATM system using switched virtual circuits between members of a closed user group (fig. 1; para. 15; para. 61, lines 1-10). The CUG is associated with a list of a management system (para. 61, lines 6-10; para. 59, lines 1-2 and 13-15; fig. 1, items 44 or 46). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to have SVC between members of a closed user group in the '278 patent provide bandwidth efficient connections between the members of the closed user group (Gallant, para. 15, lines 3-8).

Allowable Subject Matter

- 2. Claims 1-9 are allowed.
- 3. Claim 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 571-272-3166. The examiner can normally be reached weekdays from 11:00 AM to 7:00 PM ET.

Application/Control Number: 10/813,052 Page 4

Art Unit: 2666

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema S. Rao, can be reached at 571-272-3174. The centralized fax number for the Patent Office is 571-273-8300. For non-official communications, the examiner's personal fax number is 571-273-3166 and the examiner's e-mail address is kevin.harper@uspto.gov.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications associated with a customer number is available through Private PAIR only. For more information about the PAIR system, see portal uspto gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
